## VENETIAN DOORS

Step into a world of design and efficiency with Green World Venetian Doors. Our industry leading premium doors are designed to elevate any space, blending cutting-edge innovation with timeless elegance. Whether you seek seamless indoor-outdoor transitions, enhanced thermal efficiency, or effortless installation, our collection delivers exceptional results.

## STYLE-ELEVATED VINYL WINDOWS

From modern patio sliders to advanced bi-fold glass doors and expansive multi-slide systems, our selection is thoughtfully designed to complement your home's individual style and requirements. Create a space defined by sophistication, comfort, and lasting quality.

### Thoughtful **Benefits**

#### **BUILT FOR VALUE**

Premium quality sliding, swing, and multi-track doors that deliver exceptional value without compromising on performance or aesthetics.

#### **WEATHER RESISTANT**

Where wood may rot and metal may rust, vinyl stands strong, resisting moisture and mold for lasting performance.

#### **SMOOTH OPERATION**

Our premium stainless steel dual rollers and high-precision hardware create a seamless, fluid motion.

#### **DURABILITY & LONGEVITY**

Strong construction and robust materials ensure maximum longevity, even under constant use.

# WHY CHOOSE VENETIAN DOORS?

## BUILT WITH DURABILITY

Fusion-welded construction ensures exceptional durability,, and eliminates any water intrusion.

## IMPROVED ENERGY EFFICIENCY

Standard ¾" insulated glass reduces heat transfer to improve insulation, energy efficiency, and year-round indoor comfort.

## BOOSTED SECURITY

Our reliable lock and handle system is designed to keep your space secure, with optional multi-point locking system available for enhanced security.

## EFFORTLESS OPERATION

Smooth glide tandem rollers allow you to open your door effortlessly and silently.

## SECURE WEATHER SEAL

Each panel features high-performance weatherstripping for a tight seal that prevents drafts, moisture, and outside elements from getting in.

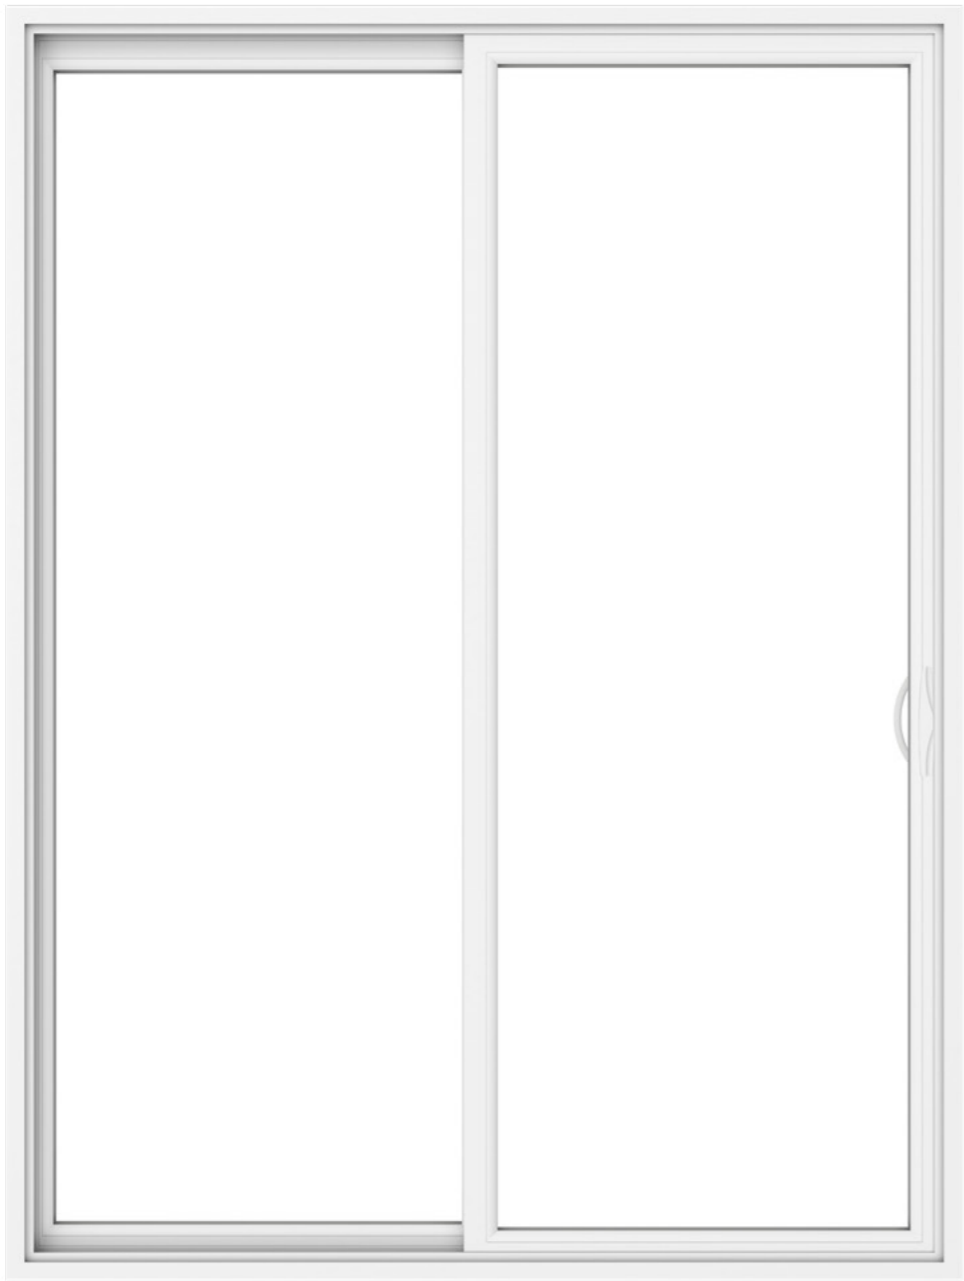

## AVAILABLE WINDOWS IN VENETIAN SERIES

# FRENCH SWING DOOR

HARDWARES

The French Swing Door features a standard manual single-point lock paired with a traditional handle.

MANUAL LOCK & HANDLE SYSTEM

Elegant handle design complements the timeless charm of French swing doors while delivering smooth, effortless operation. Single-point locking system offers reliable security without complicating the user experience. Crafted from premium-grade materials to ensure lasting beauty, strength, and corrosion resistance—indoors or out.

HINGE

Precision-engineered hinges ensure smooth, quiet swing action with every open and close. Designed to support the weight and elegance of French swing doors without compromising performance. Crafted from durable, corrosion-resistant materials for long-term reliability—indoors and out. Sleek, low-profile design complements both classic and contemporary door aesthetics.

3-POINT LOCKING SYSTEM

Our integrated locking system offers an added layer of protection and stability by locking at the top, center, and bottom, ensuring a tighter seal without sacrificing design or ease of use.

# BI-FOLD DOOR

## HARDWARES

The Bi-Fold Door is equipped with a standard manual lock and a flush-mounted handle.

## LOCK & HANDLE

Our two-point lock and bolt handle system is built for bifold doors, offering reliable security, smooth operation, and stable control. With dual locking points and easy-turn bolt handles, the doors stay securely closed and aligned. The ergonomic, compact design ensures comfort and a clean, modern look.

## HINGE

Designed for reliability and structural performance, the Standard and Push Hinges support consistent operation in bi-fold door systems. The Standard Hinge provides stable folding through precision machining and a streamlined form, while the Push Hinge integrates a fixed handle and compact profile for outward-opening applications and routine use.

## FRAME TYPES

Bi-fold doors are only available in block and nail-on frames. Retrofit and power wall frames are not available due to their substantial size and complex structure.

## AVAILABLE COLORS FOR HARDWARE:

Venetian Series

# BI-FOLD DOOR

# ACCESSORIES & OPTIONS

## FRAME FINISHES

We apply a colored capstock to vinyl windows, creating a durable acrylic layer that bonds seamlessly to the extrusions — giving you more color choices, no matter the base material.

Standard Frame Colors: Base material color for vinyl windows, interior and exterior color is the same.

Capstock Colors: Cover exterior, interior is white.

All-Over Capstock Colors: Both exterior, interior are covered with capstock coating.

## SCREEN

Our window and door screens are made from high quality materials, each offering its own unique benefits.

**Fiberglass Mesh (Standard)** - Vinyl-coated fiberglass offers strength and affordability, plus the bonus of helping keep your home cooler.

**Aluminum Mesh (Upon Request)** - Keeps insects out while maintaining clear views and natural airflow. Durable, rust-resistant, and easy to clean with just soap and water.

Screen frame color matches the window’s external frame finish.

**Sliding Screen for Sliding & French Sliding Door**  
Our sliding screen offers smooth operation and effective insect protection. Its durable frame and quality mesh ensure airflow and clear views.

**Folding Screen for Swing, Multi-Slide, & Bi-Fold Door**  
Designed for large folding door systems, this retractable screen opens smoothly and folds away neatly, offering flexible protection without blocking the view.

## ROLLER

Stainless steel rollers enhance door performance with strong, stable support and exceptionally smooth operation. Made from corrosion-resistant stainless steel, they perform well under frequent use and in changing weather. Their durable, low-maintenance design ensures reliable and quiet sliding over time.

Stainless Steel Roller

## GLASS TYPES

Low-E glass improves energy efficiency by reducing heat and cold transfer, stabilizing indoor temperatures, and lowering energy costs. It blocks harmful UV rays to protect your interiors, while still allowing natural light to enter and minimizing glare.

Low E3

Triple-layer metallic coating that blocks solar heat, reducing heat gain while letting in natural light—ideal for hot, sunny regions.

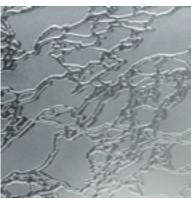

Low E4

Four-layer metallic coating that blocks summer heat and retains winter warmth, providing year-round comfort and energy efficiency.

## OBSCURE GLASS

Obscure glass gives privacy and style for windows and doors throughout your home; they are ideal for locations requiring more privacy, such as front door and bathrooms.

# FRAME TYPES & OPTIONS

## RETROFIT

Designed for replacement applications, retro frames are installed over existing window cavity without the need to disturb surrounding stucco or siding. The flush fin overlaps the existing frame, providing a clean, finished look while minimizing labor and material costs during retrofits.

## BLOCK

Suited for both new construction and replacement, block frames are designed for openings where no fin is needed. They fit directly into the window opening and are commonly used in brick, concrete, or wood-framed homes where the window is secured through the sides of the frame.

## NAIL-ON 3-COAT

Ideal for new construction, nail-on frames feature an integrated nailing fin that attaches directly to the framing studs before exterior siding or stucco is applied. This option ensures a secure installation, making it the preferred choice for new builds or full-frame replacements.

## POWER WALL 1-COAT

Designed for new construction, the Power Wall 1-Coat method compatible with wall systems using a single layer of 1" foam and stucco. It supports thermal efficiency and enables smooth window integration early in exterior finishing—ideal for streamlined projects.

## ADA-COMPLIANT OPTIONS

All of our doors are available with ADA-compliant options to ensure accessibility and safety for everyone. We offer the installation of protective kick plates on the lower portion of the doors to prevent wheelchairs from accidentally striking the glass panels. Additionally, the door tracks are designed and adjusted to accommodate smooth and easy passage for wheelchairs, providing a seamless transition. These thoughtful features combine functionality and inclusivity, making our doors an ideal choice for accessible living environments.

## CORNER GLASS DOORS

Corner Glass Doors elegantly and seamlessly join together at a corner, effortlessly expanding your living space and beautifully blending indoor and outdoor environments. Each individual panel glides independently, allowing you to customize the layout perfectly to your home's unique flow—combining style and functionality in one innovative and versatile design.

Available for multi-slide door and bi-fold glass door, for more detailed information, feel free to contact our dedicated sales team.

Who Are We

## GREEN WORLD WINDOWS AND DOORS GIVES YOU THE POWER OF GREEN

### AT GREEN WORLD

We understand that your home is more than just a place to live; it's a sanctuary where comfort and safety are paramount. This understanding drives us to deliver the highest quality products at the most competitive prices. Our mission is to enhance energy efficiency and bring new light into your home, making it a haven of comfort and style while contributing to a greener planet. We believe in the "Power of Green," and our products are designed to reflect this ethos.

### FAMILY OWNED & MORE

We are a family-owned business that has been setting industry standards since our inception. With over two

decades of experience in the industry, we take pride in our deep-rooted commitment to quality, innovation, and customer satisfaction.

Our family-owned heritage is at the heart of our business. It instills in us a sense of responsibility and dedication that is evident in everything we do. This personal touch ensures that every window and door we manufacture meets the highest standards of craftsmanship and reliability. We believe that being family-owned allows us to stay closely connected to our customers, providing personalized service and building lasting relationships. Additionally, our work environment and community are paramount to our family-owned way of business, reinforcing our commitment to excellence and community values.

### SUSTAINABILITY IS THE KEY

Our dedication to sustainability goes beyond our products. We actively engage in eco-friendly practices throughout our manufacturing process, aiming to minimize our environmental impact. From sourcing sustainable materials to implementing energy-efficient manufacturing techniques, we strive to lead by example in the industry.

As the world shifts towards remote working, we recognize that windows and doors play a crucial role in creating a comfortable and secure indoor environment. They are not just elements of energy efficiency but also vital in crafting a space where people can feel at ease and inspired. We are dedicated to enhancing your living experience through our meticulously designed products that combine functionality with aesthetic appeal.
